J. M. THORBURN & CO.'S
TRADE LIST
January, 1896.

Thorburn Valentine Wax Bean.

FIRST IN EARLINESS, FIRST IN PRODUCTIVENESS, and FIRST IN QUALITY.

This is an improved Extra Early Valentine Bean, with round wax pods. Originated with T. V. Maxon, the well-known cultivator, of Jefferson Co., N. Y. It grows only about 15 inches high, with a strong stalk and an abundance of foliage.

It is without any exception the earliest Wax Bean in use. Beans planted on June 18 produced pods 4 inches long by July 25, and on August 1 half a crop could be picked.

The pods are very meaty, and with so very little string that they may justly be called stringless. It is the best quality for snap beans of any Wax Bean in use. It is remarkably free from rust.

Combined with these valuable features of extreme earliness and excellence of quality is its enormous productiveness. In this respect, also, it excels any Wax Bean in cultivation.

Per bushel, \$4.50.

ESTABLISHED 1802.

PERFECTION PRUNING SHEARS.

FERTILIZERS.

These fertilizers are manufactured especially for us, and are reliable and efficient for the purposes specified. Bone basis guaranteed. Great care should be taken that all fertilizers are well incorporated with the soil, so as not to come in contact with and destroy the vitality of the seed sown.

Thorburn's Complete Manure. Guaranteed to contain ammonia, 3 to 3½ per cent.; phosphoric acid, all soluble, 8 to 10 per cent.; sulphate of potash, 7 to 7½ per cent.; sulphate of magnesia, soda, lime, sulphuric acid, etc. Adapted for use on all crops, such as corn, tomatoes, potatoes, peas, beans and early vegetables, and is especially suited for grain crops and for seeding down grass. Price in 167-lb. bags, per ton, \$35; single bags of 167 lbs., \$3.50; per bag of 75 lbs., \$2; 50 lbs., \$1.50; 25 lbs., \$1; 10 lbs., 50 cents. 10 per cent. discount for net cash.

Thorburn's Potato-Manure. Guaranteed to contain ammonia, 4½ to 5 per cent.; phosphoric acid, all soluble, 7 to 9 per cent.; actual potash, 9 to 10 per cent.; sulphate of magnesia, soda, lime, sulphuric acid, etc. This manure is for special use on the potato crop, and is also adapted for sweet potatoes, vines and fruit trees, and all leguminous plants. Price, in 167-lb. bags, per ton, \$43; single bags of 167 lbs., \$4; per bag of 75 lbs., \$2.50; 50 lbs., \$1.75; 25 lbs., \$1; 10 lbs., 50 cents. 10 per cent. discount for net cash.

Thorburn's Lawn-Fertilizer. Guaranteed to contain ammonia, 5 to 6 per cent.; phosphoric acid, all soluble, 5½ to 7 per cent.; actual potash, 7½ to 8½ per cent.; lime, sulphate of magnesia, soda, sulphuric acid, etc. Specially prepared for lawns and meadows as a top-dressing, imparting to grass a rich green color and vigorous growth. GLOXINIA.

Potato, "Carman No. 1."

The "Carman No. 1" is like the "Carman No. 2," a seedling from seedlings raised through several generations. It is intermediate in ripening, and resembles the Carman No. 3 in shape, and also in having very few and shallow eyes. The flesh is particularly white, perfect in quality, and very dry. It is an enormous producer, the tubers being very handsome and uniformly large. In every point of merit it is incomparably superior to any second early in cultivation.

Per barrel, \$3.50.

"CARMAN NO. 3" POTATO.

Potato, "Carman No. 3."

This new late variety resembles the "Carman No. 1" in shape, and also in having very few and shallow eyes. Without any approach to an exception, it is the greatest yielder ever introduced! Both skin and flesh are of extreme whiteness.

Our Claims for "CARMAN No. 3" are:

- 1st. It is the handsomest large Potato ever produced.
- 2d. It will outyield any other Potato whatever.
- 3d. Practically every Potato is of marketable size.
- 4th. Its table qualities are fully up to the highest standard, it has no hollow hearts, and no hard or dark parts.

Per barrel, \$6.
